

ETA CHRONOGRAPH SETTING

SPLIT-TIME function (intermediate times)

The SPLIT-TIME function enables you to stop the hands to read an intermediate time, without interrupting the timing. When you restart, the chronograph hands "catch up" to the ongoing elapsed time.

START, press **A**
SPLIT 1, press **B**
Time 2 readout
- 5 minutes,
- 4 seconds,
- 6/10ths of a second

RESTART, press **B**
SPLIT 2, press **B**
Time 2 readout
- 15 minutes,
- 36 seconds,
- 8/10ths of a second

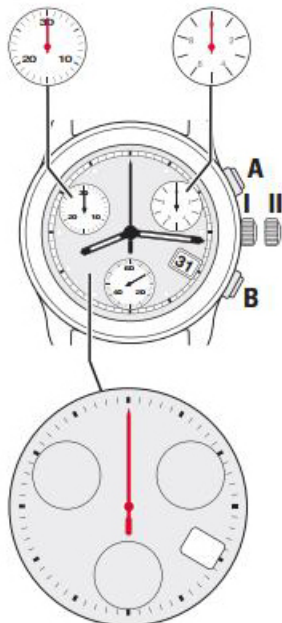

RESTART, press **B**
STOP, press **A**
Final time readout (cumulative time)
- 25 minutes,
- 18 seconds,
- 4/10ths of a second
Reset counters, press **B**

Chronograph model - Settings

Resetting the counters

The chronograph hands may need to be reset if they are not in the 12 o'clock position at rest. If necessary, proceed as follows:

Pull the crown out to position **II**;

Press push-button **A** to select the hand to reset;
- the selected hand will turn through a complete revolution.
Press push-button **B** to move the hand to the correct position;
- 12 o'clock precisely.
Press push-button **A** to select the next hand;
Follow the same procedure for the 3 hands;
Push the crown back into position **I** to exit reset mode.
